Simulated deaths
Two pathways
Ecology only
Double sigmoid
Favourable climate window
True value (b); true total, harsher climate, 490 (c)
True total, original climate, 362 (c)
(a) Fits to the simulated deaths (seed 3)
Weekly deaths
Week
(b) Recovered climate effect
Climate effect on people, b_H
true value (0.6)
ecology only: $b_H = 0$
Seed
(c) Harsher climate
Total deaths at week 22
Seed
